

# The Cooper Bussmann Productivity Through Protection™ Training Experience

The Productivity Through Protection (PTP) Tour is an electrical technology and training program designed for industrial end users/MRO, OEM design engineers, and electrical contractors. The PTP 32-foot display showcases Cooper Bussmann innovations for solving electrical distribution problems via interactive displays, video, training presentations and one-on-one discussions with a Cooper Bussmann representative.

The Productivity Through Protection Tour is for every industrial end user/MRO, OEM design engineer and electrical contractor who wants to achieve:

- Downtime Reduction
- Workplace Safety
- Code Compliance.

Select from a variety of training modules to meet the needs of your audience on subjects such as:

- Arc-Flash Reduction
- Current Limitation
- Selective Coordination
- Assembly Short-Circuit Current Rating
- Wireless Applications
- Alternative Energy Application
