

While the newest electronic components pack more power into smaller packages, a new threat to reliable operation is emerging - the Electronics themselves.

Save Your expensive components and drives with Hoffman Thermal Management Systems

As a leader in thermal management, Hoffman offers a wide range of solutions specific to your application. Below are some of the newest:

The H2OMIT™ Thermolectric Dehumidifier removes moisture from the air within an enclosure, providing an inexpensive yet highly effective way to protect electronic and electrical components from condensation. You can then vent the moisture thru all stainless steel drains with Nema 4X seals

The Genesis™ Side-Mount Compact Air Conditioner Series 17 Model is only 12 inches wide making it ideal for cooling smaller enclosures from 25cu. ft. to 40 cu. ft. with narrow side walls

When temperatures start to rise... will your equipment be ready for the heat? Schedule a thermal audit with your Rumsey representative and determine a solution to prevent equipment failure due to excessive heat.

All Thermal Audits are comprehensive and FREE

Talk to your Rumsey representative for more information on how Hoffman Thermal Management products can start saving you money!
