**POWER UP  
YOUR CAREER**

With  
Electrical  
Distribution

## A CUTTING-EDGE INDUSTRY

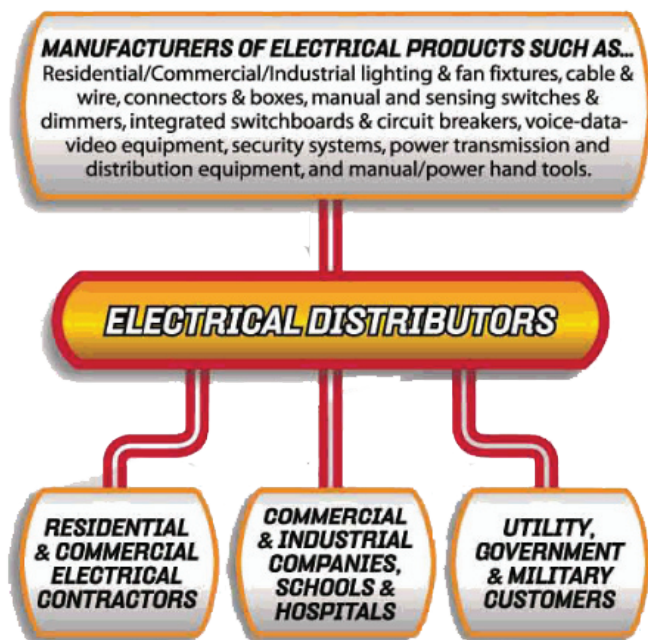

Electrical distribution is a cutting-edge industry that buys, sells and delivers thousands of products from manufacturing companies to users such as electrical and building contractors, factory maintenance, do-it-yourself, and service professionals. Although the industry deals with products, the focus is on building strong bonds with our customers and our fellow associate employees.

## WHAT DOES AN ELECTRICAL DISTRIBUTOR CAREER OFFER?

Beyond a competitive salary and benefits package, you get the opportunity to put your creativity, intellect, and resourcefulness to work using problem-solving techniques and teamwork skills. We're solution providers-salespeople, product experts, skilled and technical professionals, warehouse associates and drivers that bring the latest technology to communities across the country.

## WHAT'S IN IT FOR YOU?

- Higher starting salaries than the retail industry
- Work with innovative, technical, environmentally friendly products
- Minimal to no weekend or evening work
- Jobs cannot be outsourced overseas; distribution jobs serve local communities
- Opportunity to work for an employee owned company in a business casual atmosphere
- Ongoing professional training for career advancement
