

# NETWORKING & DATA COM SOLUTIONS

Communication technologies have become the backbone to all construction projects, whether it be commercial, residential, or institutional. Rumsey provides all of the technologies needed to support today's sophisticated communication networks, from facilities cabling, to DataComm racks and cabinets, all under one roof.

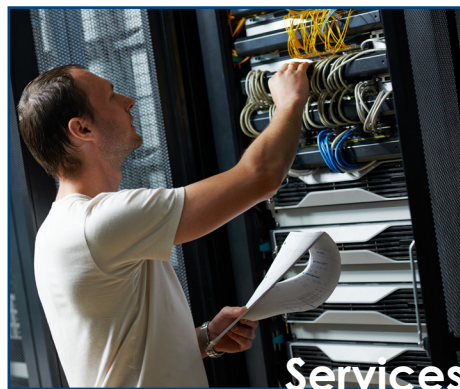

Rumsey offers low voltage products and accessories for voice, data and audio/video applications - in-stock and ready for delivery. We stand behind our products with more than 120 years of supply distribution experience, ensuring our customers receive the best service and solutions in the region.

**Solutions**

Rumsey delivers a wide range of products to support commercial, residential, and institutional applications, including:

- Cabling Infrastructure
- Wired Network
- Wireless Access Points
- Network Management

**Services**

Rumsey's product specialist can help you design, implement and manage the right solution for your data, voice and video communication requirements, including:

- Physical fiber/copper network design
- Bid packages
