

# CAN'T MISS BOOTHS

## NVENT HOFFMAN

*ProLine G2  
BOOTH 848*

The stronger modular solution designed to handle more than industrial applications. The frame has a 15% higher load rating than the competition and the subpanel can hold more than 45% more weight.

## HUBBELL WIRING

*inSIGHT™  
BOOTH 337*

Hubbell's new 30A Circuit-Lock Disconnect with integral phase indication LEDs redefines the benchmark for safety by providing insight into the enclosure while in use.

## PANDUIT

*Verisafe  
BOOTH 349*

The Verisafe absence of voltage tester provides a new and innovative way to safely, reliably, and efficiently verify the absence of voltage before accessing potentially dangerous electrical equipment.

## BUSSMAN by EATON

*Compact Circuit Protector  
BOOTH 1043*

The smallest footprint compared to any Class J disconnect solution. The CCP now features through-the-door operation and a multi-wire lug kit for enhanced application versatility.

## APEX DYNAMICS

*AFH Series  
BOOTH 1125*

A hardened and ground internal gear with 100% optimized helical case hardened and ground planet gears provide high torque capability, highest precision and increased wear resistance for high cycle rates.

## SPECTRUM CONTROLS

*PowerFlex Universal Analog Option Card  
BOOTH 123*

A perfect complementary analog interface for the PowerFlex 750 drive series. This option module allows the drive to operate independent of a PLC by monitoring motor winding temperature and a variety of other analog input signals from sensors near to the drive.

## LINMOT

*ATEX Motors  
BOOTH 1149*

State of the art high speed linear motor solutions.

## FLUKE

*3561 FC Vibration Sensors  
BOOTH 859*

Make predictive maintenance fast and scalable. Install a wireless sensor in under an hour and begin gathering data remotely. Monitor dangerous or hard-to-reach places.

## GRACE ENGINEERING

*GracePESDs® R-3W-DC  
BOOTH 1213*

This externally mounted PESD specifically designed for installation on DC systems is UL listed and self-powered upon installation to visually represent presence of voltage with flashing LED lights.

## FLIR

*E35 Thermal Imaging Camera  
BOOTH 937*

Your entry into the Exx-Series, with the resolution and sensitivity you need at the right price. The resolution offers more than 43,200 points of temperature measurement and produces crisp, vibrant imagery.

## HMS

*eWON Flexy 205  
BOOTH 137*

Monitor KPIs, export data for analysis and provide secure remote support for PLCs without needing to travel on-site.

## WITTENSTEIN

*INIRA  
BOOTH 825*

INIRA clamping and adjusting have already made the assembly of racks much faster, more accurate and more ergonomic. INIRA pinning is setting new benchmarks and further revolutionizing rack assembly.

## HAMMOND

*HPS Centurion® R Reactor Line  
BOOTH 837*

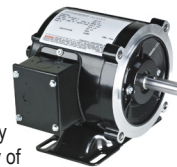

A unique blend of improved performance and reliability while reducing the product footprint. HPS Centurion® R reactors deliver protection for your motors and AC drives, while minimizing power system harmonics.

## MARATHON MOTORS

*SyMAX® Motors  
BOOTH 1305*

The Marathon® brand has a reputation for conservative motor designs and highly engineered products used in a vast array of applications around the world with unparalleled power densities, unprecedented performance, and unmatched efficiencies.

## DIALIGHT

*IntelliLED™  
BOOTH 1921*

The new Dialight IntelliLED™ enables industrial customers to connect seamlessly to Rockwell Automation controllers integrating LED lights into their machines & making the lights part of the manufacturing process.

## MERSEN

*Surge-Trap®  
BOOTH 1745*

NEW AND IMPROVED 75KA RATING Mersen's DIN-Rail Plug-gable SPD is one of a kind – the robust 75kA surge capacity along with no backup fusing requirement creates a unique offering.

## NIDEC-SHIMPO

*EJS Worm Gearbox  
BOOTH 1508*

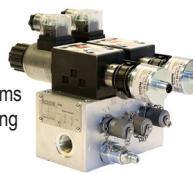

The EJS is the only high precision right angle servo gearbox that has been certified by NSF and the European Hygienic Engineering and Design Group for 3A sanitary standards.

## ROSS CONTROLS

*Block & Hold Series  
BOOTH 1409*

The new ROSS hydraulic valve systems provide a compact solution by replacing individual single valves with external pressure switches, reducing space, simplifying installation and wiring requirements.

## PROSOFT

*ProSoft Connect® with vLOTO™  
BOOTH 1317*

How do you protect workers and machines when a second worker can connect remotely? vLOTO gives users the ability to control access to remote equipment to ensure safety and security during work involving those gateways.

## ZEBRA

*FX9600 RFID Reader  
BOOTH 311*

The FX9600 brings a new level of cost efficiency to passive UHF asset tracking and inventory management.
