

VCS13171: Aerial Lifts in Industrial and Construction Environments

Reaching high places can be challenging in many work environments. But whether they're on a construction site, changing light bulbs in a warehouse, or performing outdoor utility work, employees often use aerial lifts to help them access work areas that would otherwise be almost impossible to get to.

REALTIME-SAFETY's training products on "Aerial Lifts in Industrial and Construction Environments" review the various types of aerial lifts, make employees aware of the hazards that are associated with these lifts, and give them the information that they'll need to work safely... whether they're using a lift or working around one.

Topics covered in these products include:

- The types of aerial lifts and the training required to operate them.
- The hazards associated with using aerial lifts.
- "Pre-start" and "worksite" inspections.
- Setting up, operating and moving an aerial lift.
- Working on the ground near an aerial lift.

This Micro-Learning curriculum includes the following modules:

- "Types of Lifts and Required Training"
- "Hazards Associated with Aerial Lifts"
- "Inspecting an Aerial Lift"
- "Preparing to Use a Lift"
- "Operating an Aerial Lift"
- "Completing Your Work with a Lift"
- "Working on the Ground Near an Aerial Lift"
- "Moving an Aerial Lift"
