

VCS16246: Bloodborne Pathogens in Healthcare Facilities

Bloodborne diseases continue to pose major health problems. Increasing infection rates for Hepatitis B and Hepatitis C are now making them as serious a concern as HIV, the virus which can often lead to AIDS. So it's more important than ever for employees to understand the hazards of bloodborne pathogens, the policies and practices that can prevent their transmission, and the OSHA regulations that address them.

REALTIME-SAFETY's "Bloodborne Pathogens in Healthcare Facilities" training products provide this essential information while assisting healthcare organizations in fulfilling the training requirements contained in the OSHA Bloodborne Pathogens Standard.

Topics covered in these products include:

- HIV, Hepatitis and sources of infection.
- The Exposure Control Plan.
- Biohazard labeling.
- Reducing the risk of exposure.
- Personal protective equipment.
- Hepatitis vaccination.
- Post-exposure procedures.

This Micro-Learning curriculum includes the following modules:

- "HIV, Hepatitis and Sources of Infection"
- "The Exposure Control Plan"
- "Labeling"
- "Reducing Exposure: Work Practices"
- "Reducing Exposure: Housekeeping"
- "Reducing Exposure: Materials and Equipment"
- "Personal Protective Equipment"
- "Vaccination"
- "Accidental Exposure"
- "Post Exposure Procedures"
