

VCS18306: Eye Safety

An estimated 24 million eye injuries occur in the U.S. each year. About 2,000 of them will occur today, and every day thereafter, while people are at work. All too many of them will cause the victim to lose some or all of their eyesight. But eye injuries can be prevented.

REALTIME-SAFETY's training products on "Eye Safety" provide employees with the information they need to recognize and avoid eye hazards that they can encounter in their workplace.

Topics covered in these products include:

- How to prevent eyestrain.
- Protecting against particles and splashes.
- Avoiding radiation hazards.
- What to do in case of an eye injury.

This Micro-Learning curriculum includes the following modules:

- "Preventing Eyestrain"
- "Protecting Against Particles and Splashes"
- "Avoiding Radiation Hazards"
- "What to Do in Case of an Eye Injury"
