

## VCS19335: Ladder Safety

You'll find ladders being used just about anywhere that work needs to be done up off the ground, but that doesn't mean they can be taken for granted. All too often, ladders are involved in workplace accidents that cause worker injuries and fatalities.

REALTIME-SAFETY's "Ladder Safety" training products help employees work safely by understanding the hazards that are associated with ladders as well as how to avoid them.

Topics covered in these products include:

- Ladder selection.
- Inspection before use.
- Setting up and moving ladders.
- Climbing on ladders.
- Ladder accidents.

This Micro-Learning curriculum includes the following modules:

- "Selecting the Proper Ladder"
- "Inspecting Ladders Before Use"
- "Setting Up and Moving Ladders"
- "Climbing Ladders"
- "Working on Ladders"
- "Ladder Accidents"
