

VCS19361: Machine Guard Safety

Machine tools and powered equipment help us to do more and heavier work than we could ever do on our own. But roughly 15,000 machine-related accidents also occur every year, causing severe injuries and hundreds of fatalities. Most of these incidents could have been prevented by the proper use of machine guards and other safety devices.

REALTIME-SAFETY's "Machine Guard Safety" training products provide employees with a thorough understanding of the machinery hazards that they may face, as well as how to avoid these hazards.

Topics covered in these products include:

- Dangerous mechanical motions.
- Types of machine guards.
- Guarding points of operation.
- Safety devices.
- Safe work practices.

This Micro-Learning curriculum includes the following modules:

- Dangerous mechanical motions.
- Types of machine guards.
- Guarding points of operation.
- Safety devices.
- Safe work practices.
