

VCS14193: Work Practices and Engineering Controls

As part of its HAZWOPER regulations, OSHA created comprehensive training standards to make sure that employees can recognize, handle and dispose of HAZMATs and hazardous waste safely.

REALTIME-SAFETY's training products on "HAZWOPER: Work Practices and Engineering Controls" help employees to understand the nature and "behavior" of hazardous chemicals, and how to reduce or eliminate potential exposure to hazardous materials in their work environments using work practices and engineering controls.

Topics covered in these products include:

- General HAZMAT work practices.
- The Site Safety and Health Plan.
- Responsibilities of the Site Safety and Health Officer.
- General HAZMAT engineering controls.
- Ventilation systems.
- Remote-controlled equipment.
- The use of eyewash stations.

This Micro-Learning curriculum includes the following modules:

- "Work Practices"
- "The Site Safety and Health Plan"
- "Engineering Controls"
- "Common Engineering Controls: Ventilation Systems"
- "Common Engineering Controls: Remote Controlled Equipment"
- "Common Engineering Controls: Eye Wash Station"
